

Manifesto: President of Guidance

Hi, my name is Morgan, I'm a 2nd year Equine Science student and this is why I hope to continue to be the President of Guidance this coming academic year. This year I learnt so much in my role, from how we can bring about change using the student voice, to putting on engaging events to improve the student experience. Along with our biggest improvement of bringing about the opening of the students union loft. I have always been passionate about creating a more welcoming environment for everyone, as I believe everyone should be able to be themselves comfortably, where they choose to work or study. It's important to me that Hartpury continues to grow and evolve with all students in mind, no matter your background, age, sexuality, gender, disability, religion or race. I have a few aims with the coming year that I would like to see progressed from ideas to actions:

- A designated space (electronically or physically) made for all guidance advice from the students Union. This will streamline how many students we can help and hopefully encourage more students to use the students union's resources for help. This year I have started a collation of this information but it's a project that will most likely carry over to next years candidate.
- Campaigns towards the cost of living crises, aiding students so they can have a better university vs job balance
- Create a new way to improve the promotion of the wellbeing and academic support available to students
- Try to bring more of the Hartpury community together through events and campaigns

I hope this gives you an idea of what matters to me and what I hope another year of presidency will bring about! Remember to vote and get your voice heard during these elections!
